

Greining og hönnun hugbúnaðar Problem Solving Assignment 4

Introduction

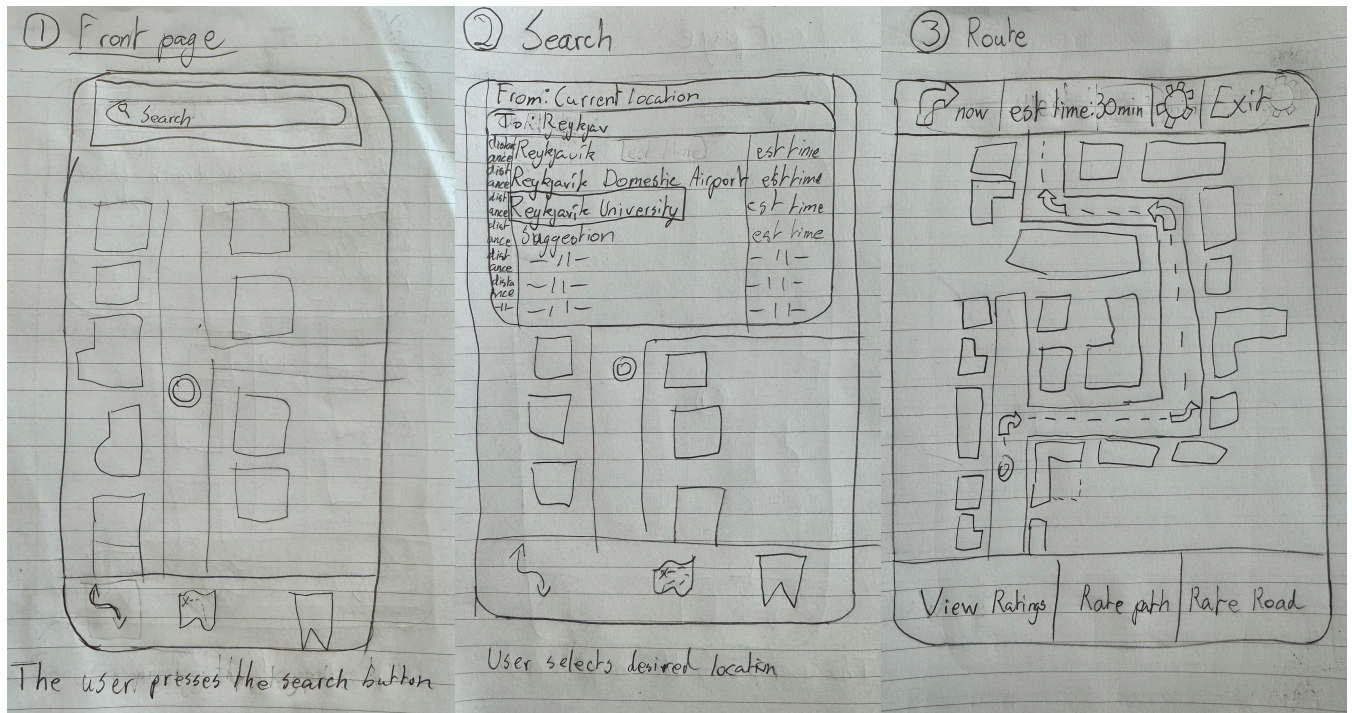

In this project, we'll be working on three different user stories from the hjolaleidir.is website. This site helps track biking routes and encourages people to build better biking habits. We'll create a happy path for each user story.

User Stories

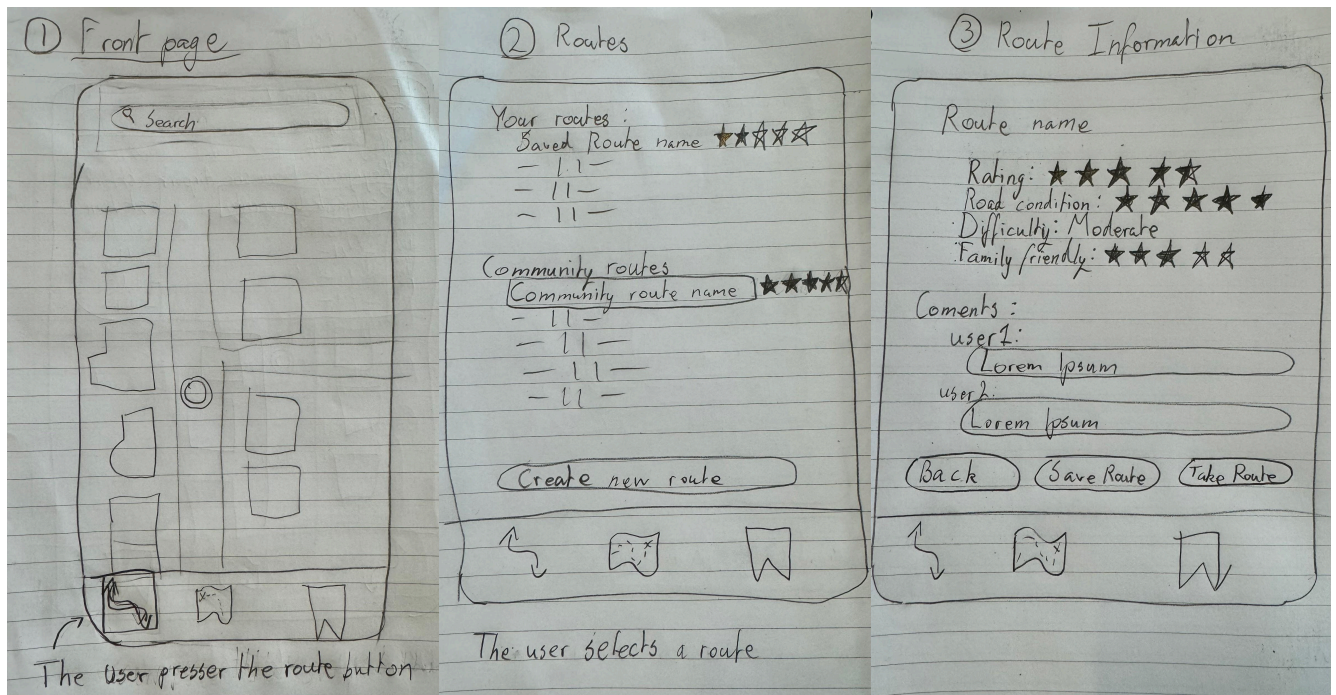

1. As a cyclist I want to be able to see a biking route(s) from a starting point to a destination
2. As a cyclist I want to be able to see specialised information on a particular biking route(road conditions, difficulty, etc)
3. As a cyclist I want to be able to rate a particular biking route

Happy Paths:

User Story 1:

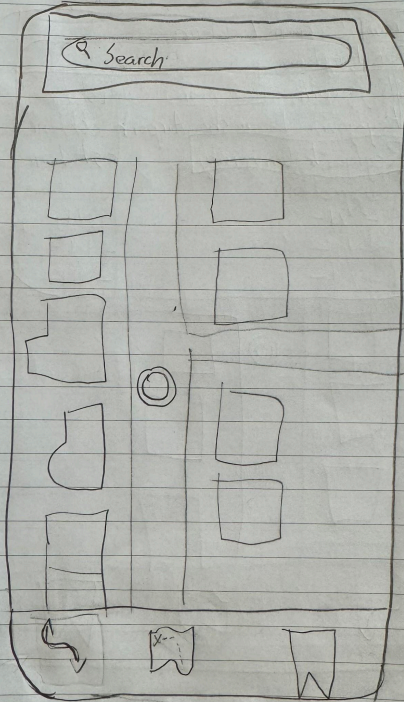

User Story 2:

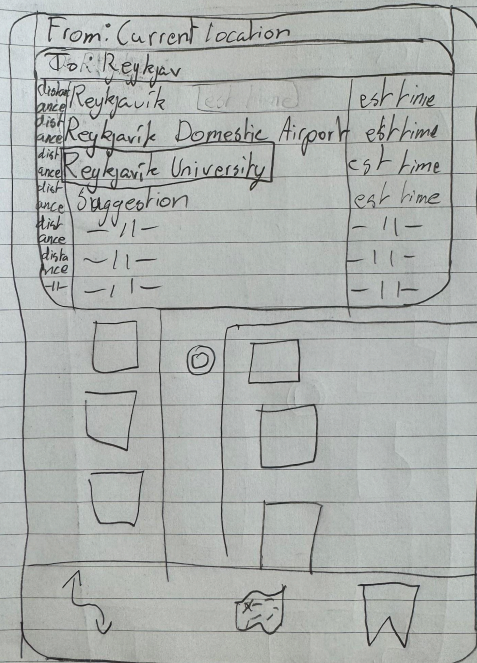

User Story 3:

① Front page

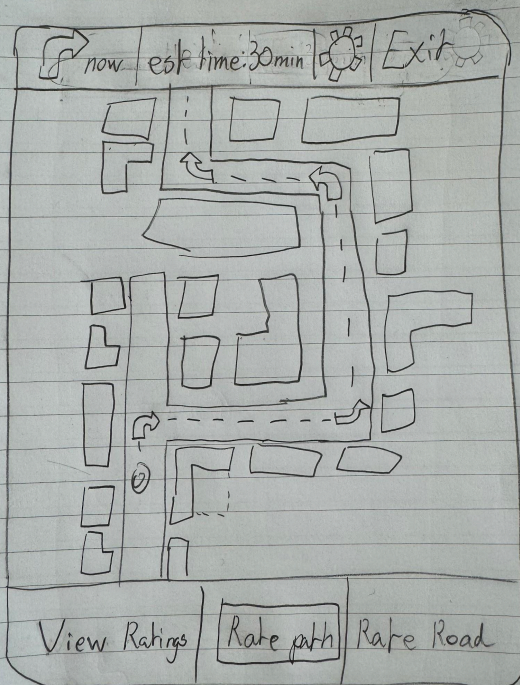

The user presses the search button

② Search

User selects desired location

③ Route

The user selects to rate the path

④ Rate route
